

The Kindness Directory is a website designed to make it easy for individuals, organisations and businesses to find food resources in their communities, and beyond.

Whether you are looking for community growing projects, cookery classes or solutions for holiday hunger, The Kindness Directory is a user-friendly way of finding out exactly what's going on. Visitors can search for something specific, or let the directory show them everything that's on offer.

The Kindness Directory is also a valuable tool for GP surgeries, community centres, clinics and schools to suggest options for individuals where necessary.

As many of these projects are run on tight budgets, The Kindness Directory also provides a great opportunity for organisations to be found by members of the community, as well as making it easy to find each other.
